

Abstract

The thiadiazole compound represented by the formula (A):

- 5 wherein R¹ represents a C1-C7 alkyl group, a C3-C7 alkenyl group, a C3-C7 alkynyl group and the like; R² represents a C1-C4 alkyl group substituted with a hetero ring group in which the hetero ring group may be substituted, which the hetero ring group is a five-membered ring containing only an oxygen atom(s) or a sulfur
- 10 atom(s) as a hetero atom(s);
- has an excellent arthropod pests controlling activity.
